

Faith In You

Praying is like saying, "Hey God, here I am a professed sinner asking you to bend the rules of natural law just for me. You know, cheat just a little in order to attend to my personal needs."

This is a demo.

Hopefully to re record in a professional studio soon

**So, you say
You have found the truth
That you now believe
Though you have no proof
They say, that faith
In God will see you through
But what about
A little faith in you
God's not gonna, get you through life,
see that you're safe, be on your side**

**God's not gonna, find the cure
stop the pain, save the world**

**God is busy, making war
He has no time, for the poor
We are on this, path alone
No one there to, take us home**

**'Cause, God's not gonna
No, God's not gonna
God's not gonna**

**You pray, because
It feels good when you do
As if God were there
Taking care of you
We are one, on earth
Lucky planet out in space
And Our goal is to
Protect the human race**

That's not God's job, It's our job. To protect the human race
